WHY?

Every day, one pedestrian is hit by a motor vehicle in the Capital Region. These collisions almost always result in injury, which can be serious and sometimes fatal.

Approximately 60 percent of pedestrian collisions happen in crosswalks. It's a mistake for pedestrians to assume that just because they are in a crosswalk, they are safe.

Safety is a Shared Responsibility!

Top Errors Pedestrians and Motorists Make

- Jay-walking
- Violating the "DON'T WALK" signal
- Not activating warning lights
- Not confirming all vehicles have stopped

- Failing to yield the right of way to a pedestrian
- Backing up unsafely
- Running off the road

Make safety a priority. **POINT/PUSH, PAUSE, PROCEED** makes it easy for drivers to see you when you cross the street.

MORE INFO

Safety is a shared responsibility between pedestrians and drivers. Learn more safety tips. Our goal is to have **ZERO pedestrian-related collisions.**

1

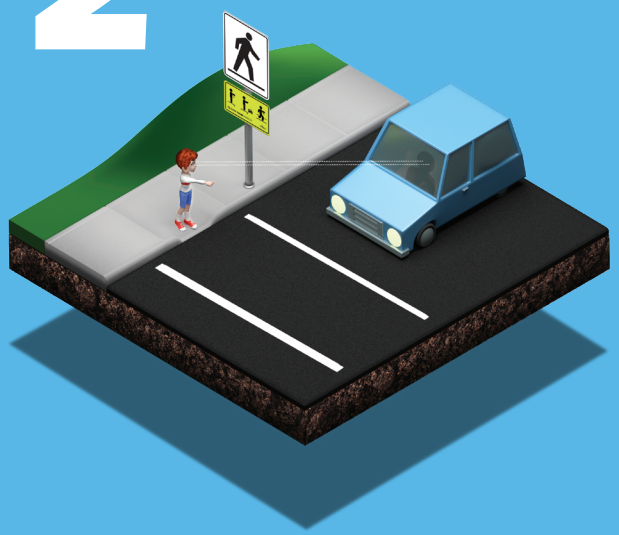

POINT OR PUSH

Make safety a priority. Always use a crosswalk or the closest intersection when you want to cross the road. **Push** the button to activate the warning flasher when available. Otherwise, **Point** in the direction. This tells drivers what you want to do.

- **Approach the curb.**
- **Push the warning flasher button if available or extend your arm straight out in front of your body pointing in the direction you wish to cross.**

2

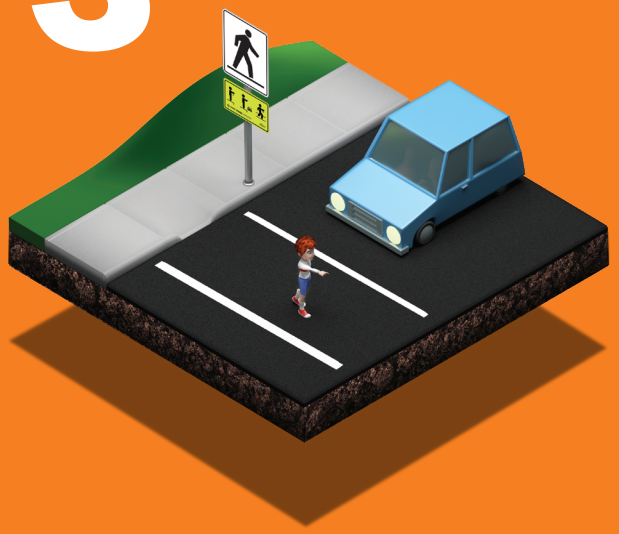

PAUSE

Never assume a motorist sees you. **Pause**. Look both ways and do not leave the curb until all vehicles come to a complete stop. Check to see if warning flashers are working, make eye contact with drivers and watch for turning vehicles.

- **Wait for traffic to stop.**
- **Make eye contact with the driver. Ensure they can see you.**
- **Be aware of turning vehicles.**

3

PROCEED

When it is safe, **Proceed** across the street. If applicable, keep your arm extended and watch for traffic in both directions. Avoid distractions like texting, using your mobile device or wearing headphones.

- **Walk across the street to the closest side.**
- **Do not stop.**
- **Do not change direction.**
